

Dear Chairman Powell and FCC Commissioners---One would have to be deaf, dumb and blind not to notice how radio and television has failed / is failing to provide useful, meaningful news of the candidates and political issues.

The public air is supposed to belong to the people---yet in many places in the US, only one viewpoint can be heard.

How can the voters be expected to make an informed choice if all that is broadcast in many places is partisan propoganda?

We feel you have failed in your mandate to keep the public airwaves free.

If we lose our democracy, it will be in large measure your failure.

Sincerely,
JR Haber, Editor
